SOLUTIONS

IoT Smart City

We have built our own **Internet of Things** (IoT) product that has been implemented at the Government level in Ukraine. It has proven to be a sustainable and reliable solution for critical Ukrainian infrastructure even during the wartime

- Police and Emergency
- Public city transportation and Railways
- Energy and others

IoT Fleet Management

IoT-based solutions for medium and big companies that need to manage their fleet of vehicles

- GPS tracking
- Fuel Consumption monitoring
- Dispatching
- Vehicles control by areas
- Reporting and Analytics

Custom IoT Solutions

Our **IoT platform** processes any data from different types of sensors, which allows building solutions in different industries. We can build the custom **Internet of Things** solution for you or just provide our IoT API and SDK as **White Label** to shorten your development process and speed up the release date

Marketing Tools and CRM

- Key metrics analytics
- Page speed optimization
- SEO compliance
- SMM content creating and distributing tools

ERP Systems

- Resources management
- Data-driven decision-making
- Processes automation and digitalization
- Dashboards and reports

Other

Our team is ready to discuss any of your ideas and transform your business requests into a tailor-made software solution
