❖ **An Introduction:**

Evince consider communication as the most crucial reason behind the success of project. Evince provides a flow of communication which keeps all the data in place and secure. The conversation methodology followed by Evince is as mentioned below.

- **Skype Call:**

Evince creates a Skype group for the project in which all the team members working on the project are added. Evince adds the client in the group for day-to-day communication and project updates. The client can directly communicate with team members on chat and call.

- **E-Mail:**

Evince manages all the essential and confidential communication through email with the client. Evince updates client on payments, milestone completion, project credentials, weekly PSR report, etc. through email communication.

06-May-19 to 10-May-19 PSR #13 - getTREAD 

1. General Details

PSR Date: 10th May, 2019
 Reported period: 06-May-19 to 10-May-19
 PSR prepared by: Evince Technical Team (Rahul Patidar)

2. Activities/Deliverables Status

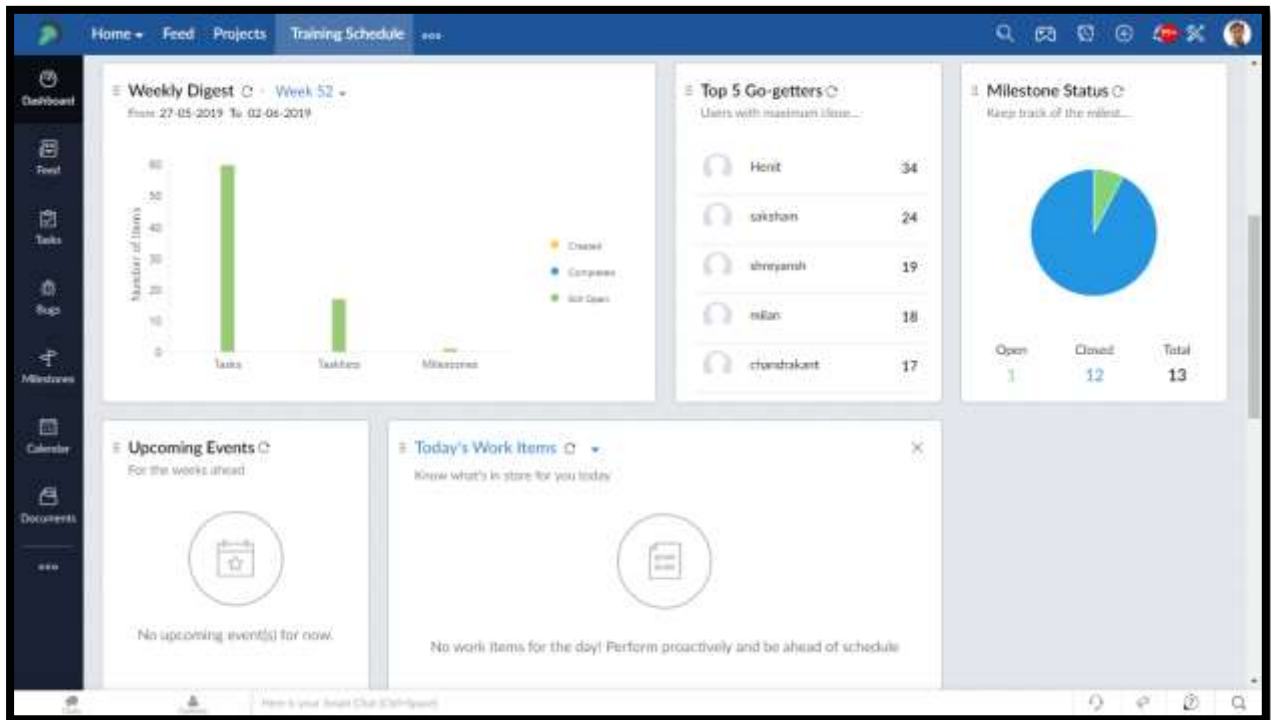

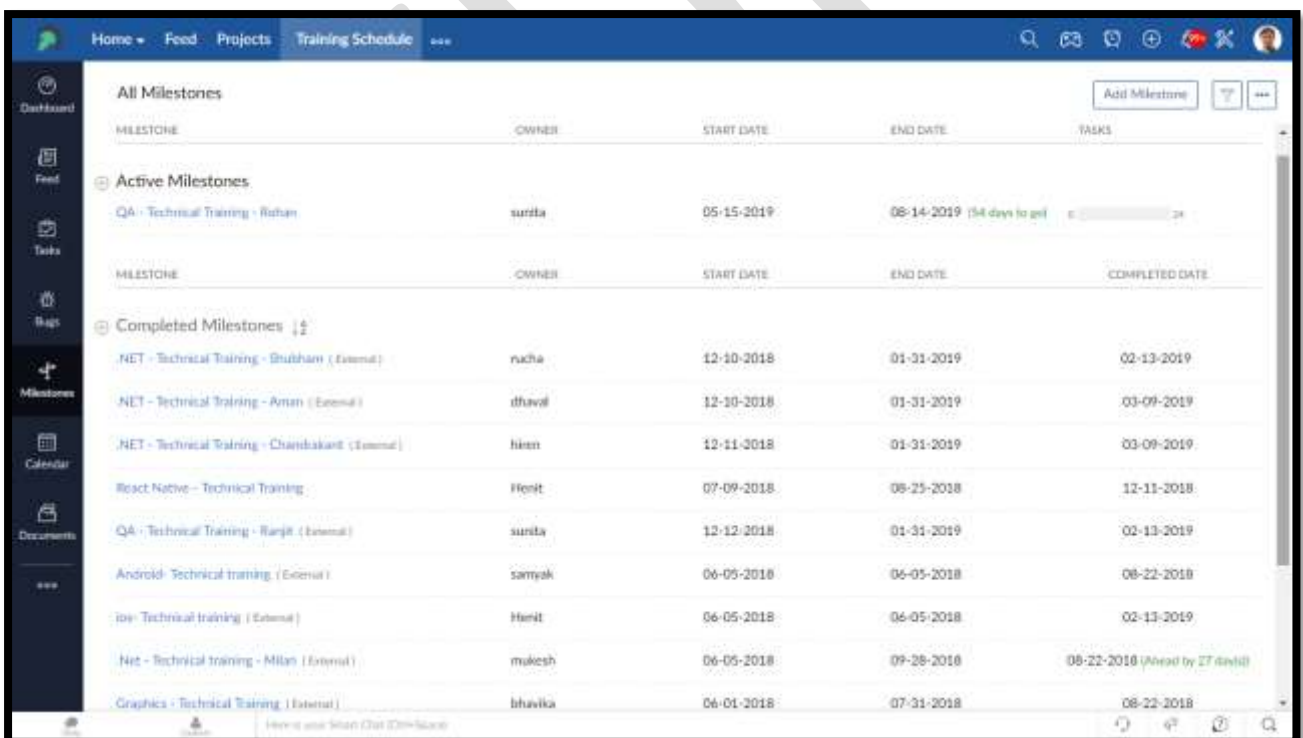

Activity / Deliverable	Status	Estimation Hours	Owner	Comment
WordPress Application	In Progress	48	ED	<ul style="list-style-type: none"> Tire listing page custom product filter integration based on single and multiple size. Received Full tire data from FG. Checked the CSV and find optimum solution for import huge data into system. Communicate with FG for queries and map the new data into system. Made Tire listing ajax base for all attributes with pagination. Share listing page can be available for social sharing now.
WordPress Application	Completed	16	ED	<ul style="list-style-type: none"> Imported large new sample CSV into system and checked with different scenarios for combine size and single size. Cross verify with supplier API response to update the price and QTY into system Acuity Scheduling custom Calendar integration with Acuity API Completed the analysis of gettiresize and createorder API for TreadMaxx supplier. This will be ready for integration in supplier application.
Grand Total in Hours:		64		

3. Priorities for coming Week						
Tasks	Task Description					
Complete the flow of Tire purchase till shop page	Complete the tire purchase flow according to new layout received and update/remove each screen's sections.					
Optimize import script	Optimize the import script which will run on monthly basis and capable to handle the large CSV tire data.					
Earliest Mobile installation	Earliest Mobile installation date and time display to user on shop page concat with supplier delivery time.					
4. Project Issues						
S. No.	Issue Details	Resolutions Date	Owner	Status	Remark	
1	None	None	None	None	None	
5. Project Risks						
S. No.	Risk Details	Resolutions Date	Owner	Status	Remark	
1	None	None	None	None	None	
6. Queries						
<ul style="list-style-type: none"> How many future limits of day will be there in calendar? What would be the delivery time of supplier TreadMaxxx? 						
7. Possible Showstoppers						
<ul style="list-style-type: none"> Earliest Mobile Installation Filter in tire listing page. This feature is taking so much time in implementation. We would suggest to move this to second Phase of website. However, we will display the Earliest Mobile install time to customer on each tire section. 						
8. Discussion and Conclusion						
<ul style="list-style-type: none"> N/A 						
9. Gantt Chart

- ZOHO Project Management Tool:**

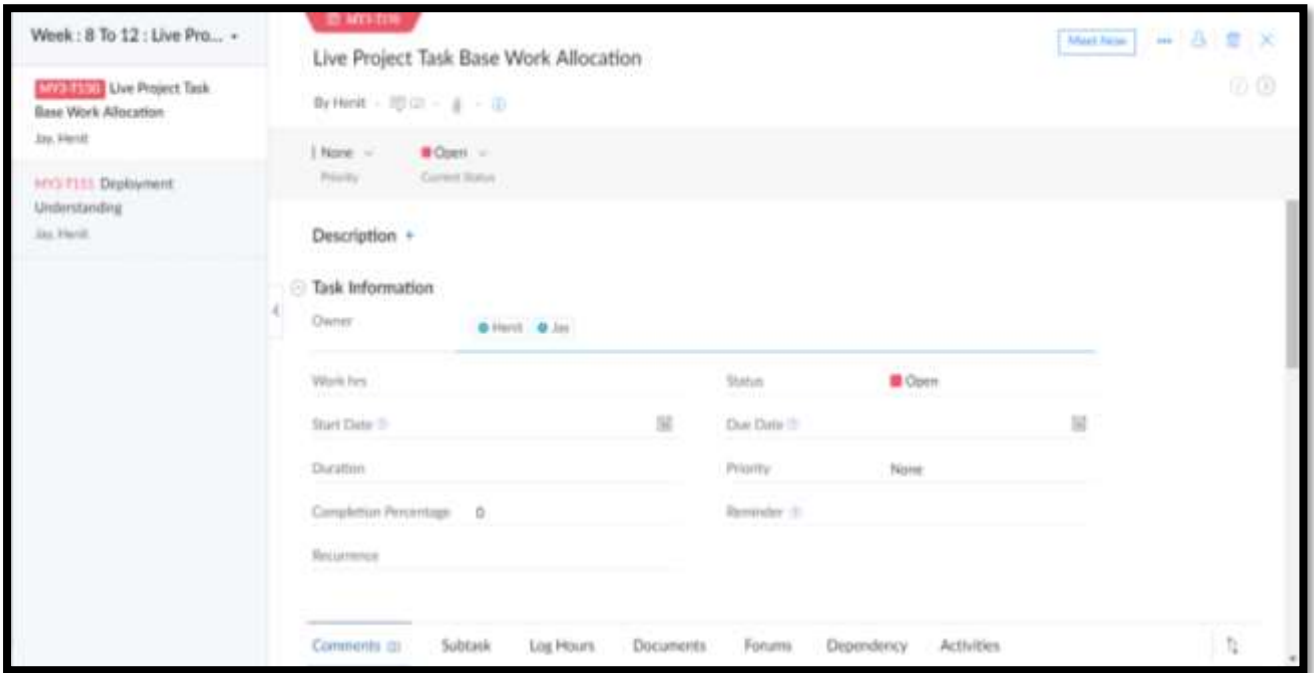

Evince uses the ZOHO project management tool for managing the entire project. Evince assign the role to the client in the ZOHO PMS tool, and client view the Work Break Down Structure, tasks assigned to particular team members, progress on each task, deadline of each job, daily updates, etc. Evince will manage the complete project on ZOHO PMS tool, which will act as a Directory for the whole project. The following are the components of the project we can track through ZOHO.

- Work Breakdown structure with Task, subtask, assigned to, date of start, date of the end, status, etc.
- Task-Based discussion between team and client coordinator.
- Document Management task-based and general both facilities are available.
- Direct Discussion with specific User from the project or Group discussion.
- Tracking of the sequential task and dependent task.
- Tracking of project progress online 24 X 7.
- Rich reports like Burnout Report, Gantt chart, Project status report.

The screenshot displays the 'Live Project Task Base Work Allocation' interface. On the left, a sidebar shows a navigation menu with items like 'Live Project Task Base Work Allocation' and 'Deployment: Understanding'. The main area features a task card with the following details:

- Title:** Live Project Task Base Work Allocation
- Owner:** Herit, Jai
- Status:** Open
- Priority:** None
- Completion Percentage:** 0
- Recurrence:** (empty field)

At the bottom of the task card, there are tabs for 'Comments', 'Subtask', 'Log Hours', 'Documents', 'Forums', 'Dependency', and 'Activities'.
