Web Application Development

MindK helps companies around the globe to automate business processes, reduce manual work and grow the bottom line by leveraging the web technology. From ideating with a prototype to building and scaling your web application, we can guide you every step of the way.

Offerings:

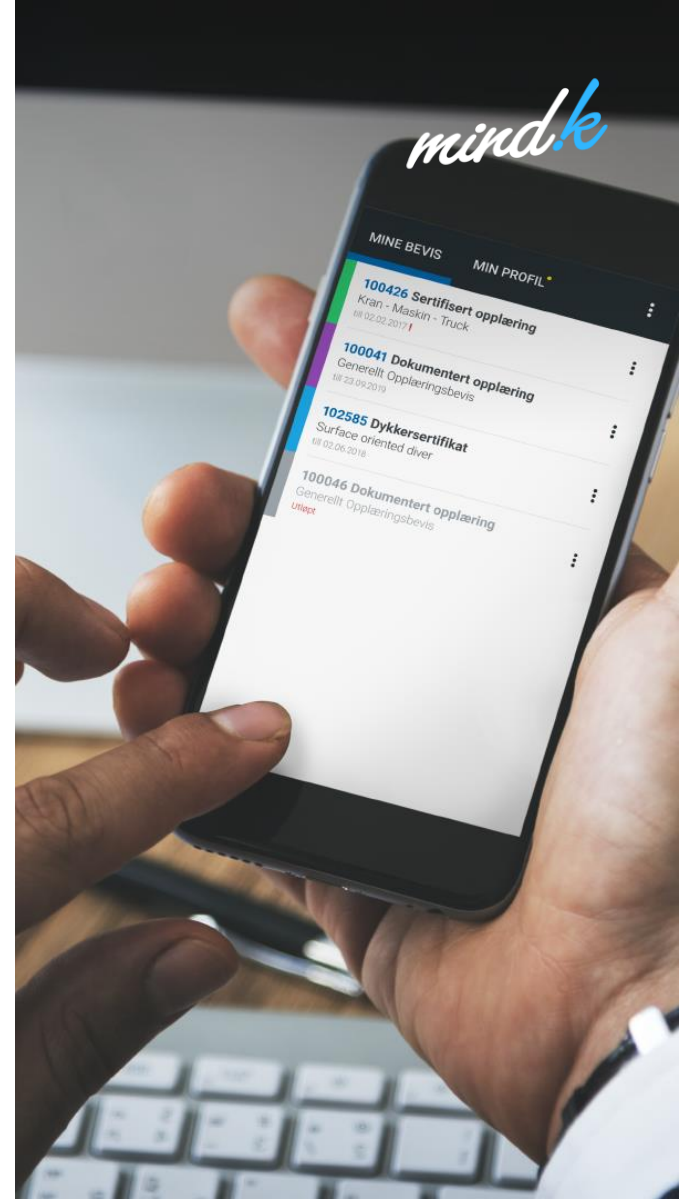

- Front-end
- Back-end
- API and Integrations
- SaaS solutions

Mobile App Development

MindK transforms business ideas into sleek mobile applications, both native and cross-platform. Our aim is always to take the app to market as quickly as possible and iteratively improve it until we achieve all business goals, fulfil market and user needs, and develop unique differentiators and features — on schedule and without breaking the bank.

Offerings:

- Business mobile apps
- Cross-platform mobile apps
- Mobile web applications
- Integration of 3rd-party services into mobile apps
- Assistance with getting your app in the App Store and Play Market

Web Portal Development

MindK helps to bridge the gap between your brand and your customer expectations through beautiful, fast, secure web portals. Whether it is a new website, or custom CMS extension to empower existing solution, we ensure your customers are met with personalized and contextual engagements that help tell your story, keep them engaged and coming back for more.

Offerings:

- Progressive Web Apps
- Bringing designer concept to life with HTML5 and CSS3
- E-commerce and CMS solution customization
- Web performance optimization
- Development of custom desktop and mobile optimized layout

DevOps

MindK DevOps team will design, set up and manage a stable and secure infrastructure that sharpens development processes, improves business agility and guarantees 24x7 uptime.

Offerings:

- Release management
- Log management
- Data backup and disaster recovery
- Infrastructure architecture
- Automation and orchestration
- Continuous Integration
- Delivery pipeline
- Cloud migration and cost optimization
- Automated monitoring and alerting

Quality Assurance and Test Automation

MindK delivers an independent QA service to give you better control of the solution quality, help evaluate the product's compliance with industry standards, business requirements and get valuable insights into end user impressions of the product. We leverage QA automation to test complicated scenarios and business logic in a robust and reliable manner, saving a lot of effort and boosting time-to-market.

Quality Assurance and Test Automation

Offerings:

Web Test Automation

- Smoke testing
- Functional testing
- Regression testing
- Integration testing
- E2E UI testing
- Acceptance testing
- Localization testing
- Cross-browser testing

API Test Automation

- API testing, including SOAP web services and RESTful APIs
- Support for all industry-standard data serialization formats (JSON, XML, plain text, etc.)
- Custom-tailored HttpClient for optimum results
- Non-UI functional testing

UI/UX Design

MindK combines data-driven insight, an aesthetically pleasing design, and your creative vision to come up with a visual concept of your solution. You obtain an engaging digital product, an enterprise software that has the snappy feel of consumer apps or a web portal that keep users coming back for more.

Offerings:

- Product conceptualization
- User Interface (UI) design for web and mobile platforms
- User Experience (UX) design, including user personas, sketching, prototyping and site map creation
- Animation and interaction design
- Graphic design
