

THE NEXT 7 THINGS YOU SHOULD DO FOR SUCCESSFUL SMALL BUSINESS WEBSITE DESIGN

1. RESPONSIVE WEBSITE DESIGN

Gone are the times of desktops

Today in this quick paced world, business is done on mobiles and tabs.

So right off the bat, your website ought to be responsive.

Thus,

A mobile friendly website design is the need of the hour.

2. PRECISE PLACING

Top left corner for Logo

Contact always comes in Top right

Search in the header

Social Media is meant for the Footer

Top is reserved for the main navigation bar

3. SEO FRIENDLY WEBSITE

Does only building a website can sell your products/services?

Obviously not, it must be displayed to the world.

It should be the one who always ranks on the top in the search engine.

4. SOCIAL MEDIA IS A MUST

Social Media has become a powerful weapon from promotion's point of view.

Integrating social media into the website could make it reach to a larger set of audiences.

5. SECURITY IS A PRIORITY

As we ensure our home, we should secure our business because a single virus can harm your website. In this advanced time, business highly depend on websites, so integrate basic security features in your website and then don't worry about any malware attacks or viruses.

6. QUALITY TRUMPS QUANTITY

In this quick paced life, nobody has the time to read stories on your website.

Your message should to be clear and concise.

A long feature list or several pages would not lead a great sell, rather go for quality content.

A short and sweet content with lucrative graphics could serve the need.

7. QUICK LOADING TIME

Website should have a very quick loading time of fewer than three seconds.

The faster the website, the greater will be the traffic.
