PARADIGMA DEVELOPMENT

WHO WE ARE

We are a full-stack web development company. Our main passion is high performance in our apps.

We build all your applications and sites by this principle. So if you need the fastest blog, or high-performance e-commerce site, or modern web application for your startup idea, then welcome.

Mikhail S, CEO

WHAT NEEDS WE SOLVE

AVAILABILITY OF FAST AND HIGH-QUALITY WEB APP DEVELOPMENT FOR START-UPS AND SMALL COMPANIES

Maintaining one's own web development department is difficult, risky, expensive and not relevant. Large companies' services are expensive, often slow and they often do not work with low-middle-price clients. Freelancers often are unreliable and provide lower quality service, have limited qualifications and resources. We solve this!

THE FASTEST SEO BLOGGING SITES FOR THE BEST INBOUND MARKETING

Many companies try to attract customers through blogging without enough requirements for the platform itself and fail. Today full site compliance with all the expectations of search engines is a necessary factor for success. And its speed is one of them. We have solved this too!

HIGH-PERFORMANCE E-COMMERCE SITES FOR ALL

It has long been clear that box solutions on CMS do not meet the needs of at least a little growing e-commerce business. But the transition to high-performance and reliable systems is often impossible because of budget constraints. But we're doing just fine!

WHAT WE OFFER

**Modern
web app
development**

**The fastest SEO
blogging sites**

**High-
performance
E-commerce
sites**

**Supplementary
services:**

**Research and consulting
Product and web design
Project management
Hiring and Outstaffing**

TESTIMONIALS

Excellent! I was impressed with how observant and responsible this team is when we just started working together. Working with them is pure pleasure. They listen to you first and then they just do magic with all the technical parts. I love the results we achieved together.

Cathal Brown, WorldAPP, Chairman – Massachusetts, United States

We have used Mikhail for a social media platform within sports and we are truly satisfied with the delivery. Mikhail and his crew is dedicated and good. We run several projects with Mikhail now and we are satisfied.

Magnus Jansson, CAAi AB, CTO – Stockholm, Sweden

When I need a website for any of my projects again I know that the best solution is just asking Paradigma. They offer simple process, quick and high-quality results and definitely good-looking websites. So I just let the professionals do their job and would highly recommend you do so as well!

Greg Blackman, Co-Founder & CPO at Media Scout – Los Angeles, California, United States

Our original company's site was very slow and had several issues. Michael did an amazing job rewriting our site and addressing all the performance issues and bugs. As a result of his work, our site consistently scores in high 90s on Google's PageSpeed Insights. Furthermore, Michael completed the project within just a few days to make sure our site is in perfect shape by the start of a conference that our company was participating in.

Gene Libov, Planet 9, President – San Francisco, California
