IoT Based Enterprise Tracking System

Client Name: SenseGiz Star

URL: www.sensegiz.com

SenseGiz makes enterprise and industrial IoT products for sensor based condition monitoring, security and real time asset/people tracking applications using a combination of proprietary mesh connected hardware, cloud, analytics and apps.

It provides IoT Solutions for Warehouse (Indoor/Outdoor Operations). It works real time location tracing of indoor and outdoor operations, movement and idle time.

The screenshot shows the SenseGiz web interface with a table titled "Geofence of HR 26 DM 1993 Is: Location 13". The table has four columns: "Current Location", "Geofence Status", "In time", and "Out time". The data rows show alternating locations (13 and 11) with a status of "Outside Geofence" and specific timestamps.

Current Location	Geofence Status	In time	Out time
Location 13	Outside Geofence	13-07-2019 17:18:27	13-07-2019 17:30:00
Location 11	Outside Geofence	13-07-2019 17:17:02	13-07-2019 17:18:00
Location 13	Outside Geofence	13-07-2019 17:14:30	13-07-2019 17:15:00
Location 11	Outside Geofence	13-07-2019 17:12:47	13-07-2019 17:14:00
Location 13	Outside Geofence	13-07-2019 17:11:46	13-07-2019 17:12:00
Location 11	Outside Geofence	13-07-2019 17:08:41	13-07-2019 17:10:00
Location 13	Outside Geofence	13-07-2019 17:06:57	13-07-2019 17:08:00
Location 11	Outside Geofence	13-07-2019 17:02:18	13-07-2019 17:04:00
Location 13	Outside Geofence	13-07-2019 16:58:24	13-07-2019 17:00:00
Location 11	Outside Geofence	13-07-2019 16:56:16	13-07-2019 16:58:00
Location 13	Outside Geofence	13-07-2019 16:53:07	13-07-2019 16:54:00

Testimonials - Client Says

We hired OneClick to create and develop a project for us. This project included created an android app and setting up a database and website. They did an excellent job with everything we asked for. We will continue working with them in the future.

- " Peter

I am very satisfied by the work done by IT Oneclick. With little time project we established a relationship of trust and with good results. The process established by the team was very good, considering: - Business Analysis - Project management - Development - Guarantee tests - Software Quality.

- " Macro F

We worked with OneClick IT on a rebuild of an existing product. We are software developers ourselves, so our expectation was pretty high. By giving OneClick a clear set of requirements, they were able to move quickly and produced a very impressive result. The key, I believe, is in making sure that you are clear about the requirements. If you communicate exactly what you want, they are more than capable of delivering great results.

- " David D
