5 How to Reach Us

**We are
Dreamers,
Achievers,
Passionate
Developers.**

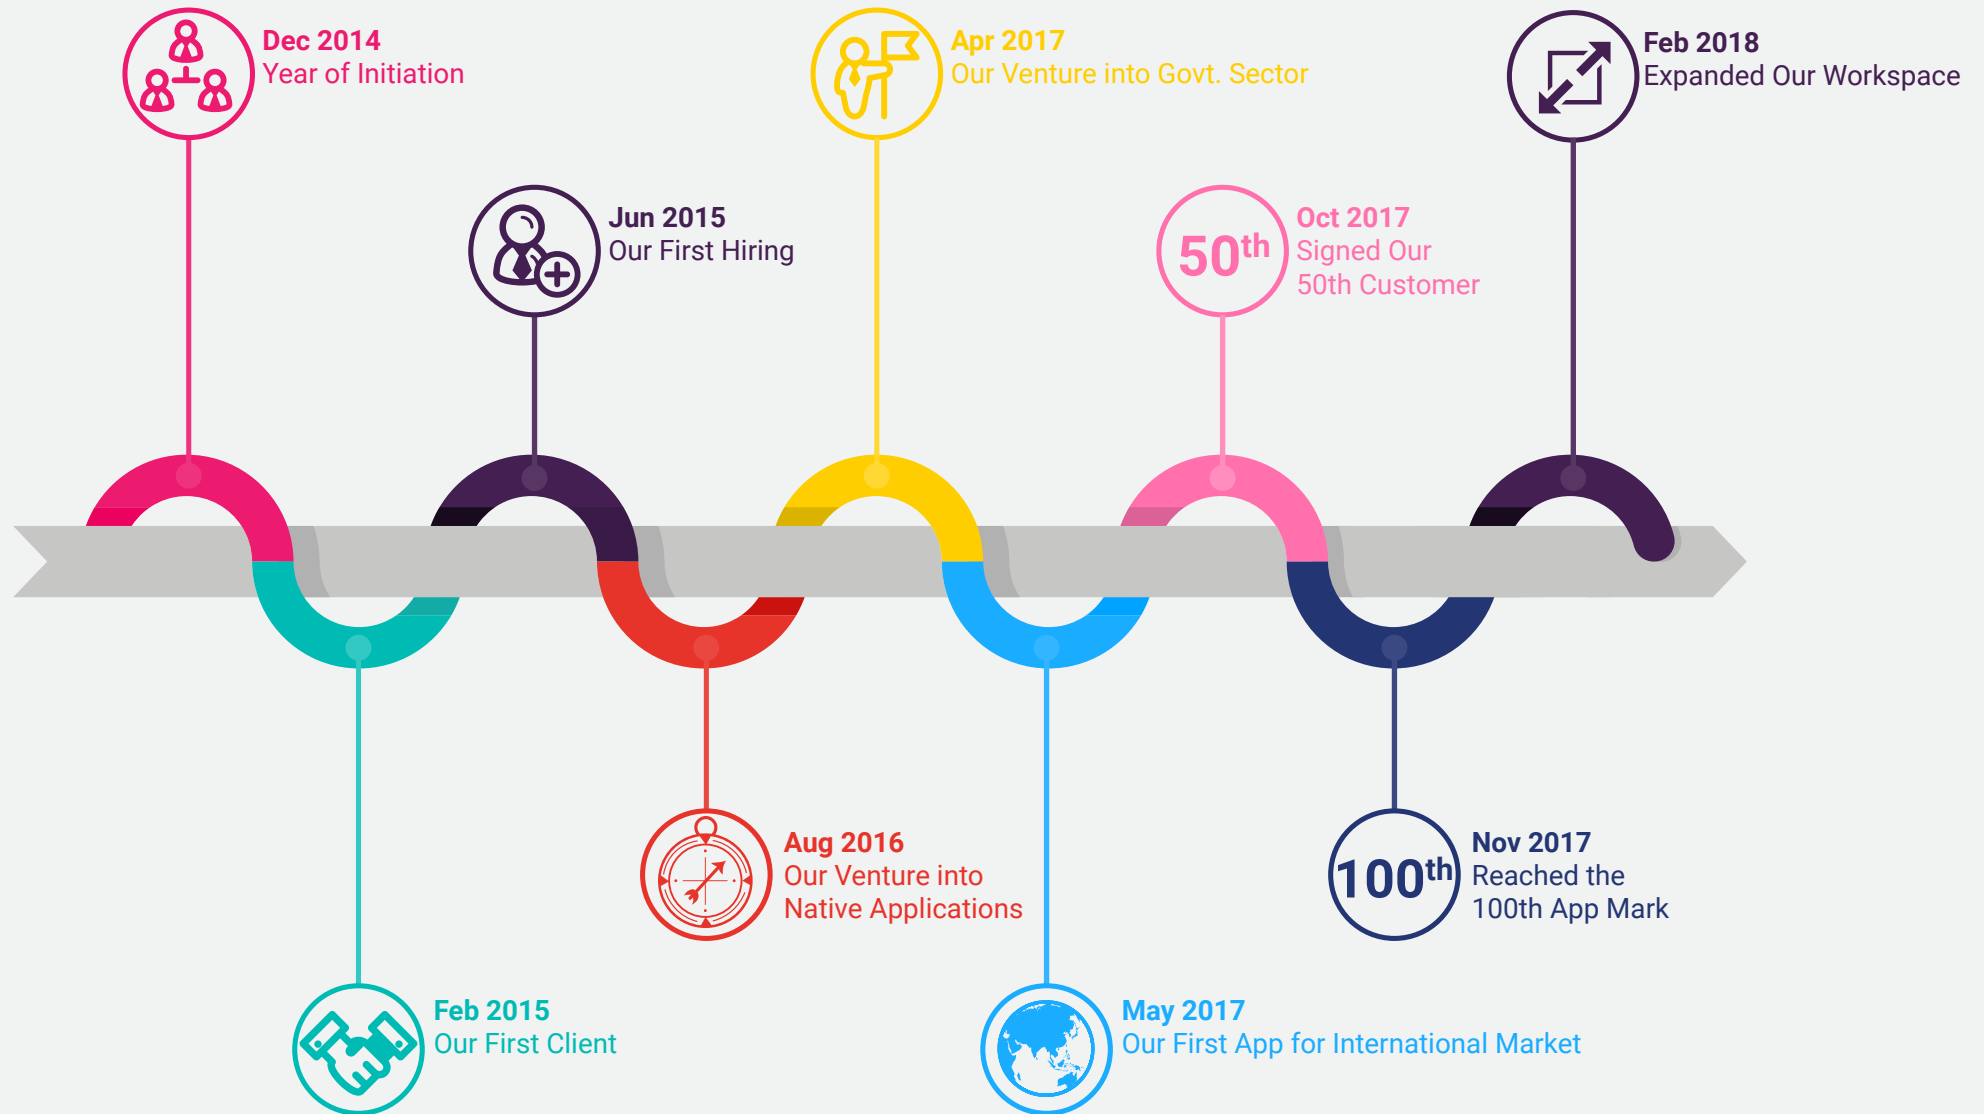

Our Vision

We have a dream. A dream to build a community connected with our apps. A dream where we simplify the lives of thousands with breakthrough technology created and honed by us. Our dream is to build and promote a society that uses tech to its utmost potential.

Our Story

We never hesitate
in going the extra
mile for our
customers

Products

Terasol Technologies wants to change the world one app at a time. We refuse to be conventional. We have learned how to make major comebacks from minor setbacks and our products are proof of our journey.

Our work is an amazing concoction where we cover everything from designing, development, branding to marketing. We create perfection and deliver satisfaction. Mixing technology and empathy we are gradually stepping onto other digital platforms of AR/VR, IoT and Blockchain Technologies.

Aeons

Aeons replaces old manual punch clocks and time sheets. It tracks attendance, keeps logs of ongoing tasks and completed projects.

Drill out

Drill Out, your personal fitness assistant, gives you the freedom to select various exercises such as yoga, cardio, running, cycling, etc. to exercise and achieve your goals.

VCDS

Aiming to help traffic police track stolen or undocumented vehicles with the help of city wise curated vehicle registry database.

Services

What do you require as a customer who needs an app built? You require an agency and not just any but one that can tell you about things you didn't realize you essentially needed.

We are not coders and designers. We are synesthetes who associate our apps to have a beating and respiring heart. When you walk in through our doors with an idea or a fully penned down brief, our minds have already started churning ideas to make it a success. Apps for us are tangible beings.

Our Menu

A complete IT solution for restaurants to serve food, bill customers and operate its chain all with the help of a single application.

Habibs

Binding all the salons of Habibs together, the app lets managing the brand easier by tracking payments, earnings, and revenues.

Samvaad

Made for the SDM of Sikan-drabad, Bulandshahr, the app aims to help report any incident/issue via text to the officials or the SDM directly.

Why Work with Us?

We work on honesty and transparency. We work with you on your ideas and make you a part of the amazing journey that an app development is.

We expertize in not only mobile apps but cross-platform apps, web apps, mobile games, enterprise apps, responsive websites, branding and digital marketing among many others. We have served clients from various fields of e-commerce, enterprises, hyperlocals, MSME, and startups of different statures.

We are not a team because we work together but because we respect and care for each other. We are always trying to build healthy professional relationships based on trust, honesty, good communication, and integrity.
