

A Technology Agency
**Building Digital Products
That Matter**

Introduction

Quality

The most important factor that leads to a successful project is the quality of work of work done, we make sure that the quality of service is never compromised.

Assurance

The delivered work is properly tested and readily available for the users worldwide is what we provide assurance of. We consider all the necessary measures before deploying.

Passion

No project can have extra flavors without the right amount of passion in it. Our team is enthusiastic enough to work on any project like a new achievement.

Vision

The work we do in present, impact our future and therefore we keep a high vision of satisfying our Client's needs which eventually leads in the prosperity of the company in future.

THINKWIK IS A PLACE WHERE WE DREAM DIGITAL, AND THEN MAKE THOSE DREAMS A REALITY.

Thinkwik is not just a web agency, it's a community of thinkers, builders and collaborators, working with it's clients on a variety of business challenges. Led by a team with more than a decade of web and mobile development experience, Thinkwik can assist companies in managing their online presence as well as help them reduce offline business operations seamlessly.

In this digital era, we help our clients with consulting, strategy making, user experience, development and marketing skills. We believe in automating business processes to build and innovate, operationally cost efficient and cutting-edge tech solutions that match your needs.

We help our clients with custom website design and development of complex enterprise level of web applications. Our main competency lies in connecting your business domain knowledge with proven technology skills and working methodologies, to deliver extraordinary results to maximize your competitive advantage and productivity.

We are fueled with just one desire, to add one more success story to this digital world.

Values

CLIENT

The opinion and suggestions of our clients are valuable for us. We take time to listen to them, to understand them and work out how we can best solve their marketing objectives to meet their business needs.

SIMPLIFICATION

Our intention is to make things simpler for our Clients and ourselves. We're striving to remove unnecessary red tape, streamline our processes and simplify our products and services to make sure our clients and users get what they need, when they need.

INNOVATION

We're all about finding new ways to improve the effectiveness of your marketing. We're not about the bleeding edge; we're about designing, building and delivering industry-leading solutions. We utilize research and technology to maintain cutting edge performance

TRANSPARENCY

We are transparent, open and honest. We are straight-talking, straight-shooting and straight down the line so that you know how things actually work. We act honestly and openly to minimize any surprises.

FINANCIAL

Before we make a decision we ask ourselves, what would we do if it was our money on the line? We consider the impact of our actions and make recommendations to our clients that meet their marketing and economic needs.

Our Leadership

OUR COMPANY'S LEADERS DECIDE WHAT THINKWIK IS ABOUT,
WHAT DIRECTION WE WANT TO GO, AND HOW WE GET THERE.

Jiten Patel
Co-Founder & MD

With over 9 years of experience in international service market, Jiten Patel is a professional and skilled entrepreneur. He is involved in different businesses like Real Estate, Construction, Restaurants, Steel in India and USA . He is computer engineers with great management skills and a futuristic person with higher goals. He is responsible for company's development strategies, Finance and account.

Dhaval Patel
Co-Founder & CEO

He is a young entrepreneur who wants to lead the technology to the fullest. He is a computer engineer with 9+ years of experience in Web and Mobile Solutions. A keen observer of technology and a firm believer in potential around him, Dhaval has come a long way. His perfect foresightedness, guidance and dedication has helped to bring the company up to this level.

Dipesh Parmar
Co-Founder & CTO

He is an experienced and exceptional software professional with 10+ years of experience who previously worked with top-notch web development companies. Dipesh has garnered an extensive business development and project management experience driving innovative and creative client projects across diverse markets in 10+ countries mostly across USA, Europe, Japan and Australia.

Our Clients Words

STEPHEN WRAY

I have been working with Dhaval for the last 3 years on various PHP and web based projects. It has always been a very good & positive experience. I have always found his communication skills to be strong, and his suggestions to improve my basic design to be helpful and insightful. I wish him all the best for his new venture "Thinkwik"

ANAND SIVARAMAN

I'd recommend Thinkwik to any individual or company looking to develop a digital application. They were a joy to work. They exceeded my expectations with timely deliverables, price that is right, being effective and efficient and above all being a thorough professional. It is very refreshing to see that a company operating from a site virtual from my own can be so responsive and efficient.

SEB MOWER

As is common in the world of web development, I met Dipesh and his team during a project crisis point. We had complicated technical hurdles to overcome, financial issues and next to no communication with the original firm. Plus, we had run out of time. Thinkwik stepped in with cool heads, reasonable demands and a plan. Since then we have worked on numerous projects with the minimum of stress and the maximum of quality.

**WE CREATE MOBILE SOLUTION FOR CLIENTS ACROSS INDUSTRIES
BOTH ENTERPRISE & CONSUMER-FACING.**

iOS

iOS development takes into account a development of applications for different class of people who are fond of using iPhone, iPad etc. It is a mobile version of OS X that is used in Apple Computers.

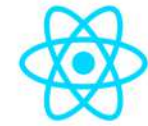

Android

Android is a linux based operating system for mobile devices which is not just limited to mobile devices, but is also accessible in tablets, televisions etc. An alliance of 84 companies (OHA) makes it a very valuable object in the industry.

Ionic

Ionic is a most popular hybrid mobile application development framework that has access to the native platform layers. It is used to speed up development time and to provide same feel and look as native to the application.

React Native

React Native is a very versatile cross-platform application development framework build on top of React.js by the developers from Facebook to improve performance and write one language for every operating system.

Case Studies

FENIX is a platform by which artists from the music industry of all degrees of popularity can interact directly with their fans, and can sell equipments like t-shirts, guitar etc of their preference. The application manages all the transactions of the purchase using a cryptocurrency FENIX.CASH, so the artists can benefit more for their creativit

Our Business Model

Project Engagement

We employ a per-project model of engagement when the scope of work is defined and fixed. With a clear idea of the features and functionality of the product, along with the technology stack to be used to build it and the time-frame needed to deliver, it is possible to calculate the efforts and resources needed to complete the project.

- ◊ Fixed scope of work
- ◊ Defined feature list
- ◊ Known technology stack
- ◊ Given time frame

Dedicated Resources

When the scope of work, though defined at an initial level, is not fixed, and may change during the course of developing the product, or when the nature of the product is such that involves continual development and iterations, we employ this model of engagement. We fix the resources to be used for the project, who then work as per their given responsibilities on the product.

- ◊ Variable scope of work
- ◊ Iterative work
- ◊ Resources working exclusively on the project as decided
- ◊ Variable time frame

Benefits

- ◆ Skilled Developers
- ◆ 100% Client Experience
- ◆ Flexible Hiring Models
- ◆ Complete Source Code Authorization
- ◆ 100% Confidentiality Assured (Strict NDA Terms)
- ◆ 24*7 Support
- ◆ Control over your Developer
- ◆ Team Transparency of Process
- ◆ Quick Team Scaling
- ◆ Ready-to-use IT Infrastructure
- ◆ Security and IP Protection
